

Agile - Scale is Challenging

Agile – Scaling:

- ✓ Small projects with small teams
- ✓ Face-to-face and Co-located interaction

Agile Manifesto and 12 supporting principles

Valid and valuable for large-scale Agile projects

Agile - Scale is Challenging

Scrum in large projects

- ✓ Multiple teams required to work in parallel
- ✓ Huge product backlog hence requires multiple product owners
- ✓ Multiple teams will have to work in parallel to complete the themes, epics, and stories involved in a large-scale project
- ✓ Greater need for specialization
- ✓ Requirement of a user interface designer
- ✓ Governing of data related policies
- ✓ When and how non-functional requirements are developed becomes more critical and if not managed well can compromise the system
