

Planning – Levels

- 1 **Vision Or Strategy** – This includes things like business goals and the strategic decisions of the company.
- 2 **Roadmap** – Create the product roadmap in order to support the vision or strategies of the company.
- 3 **Release** – Release level planning considers deliverables and features required for each release that supports the product roadmap.
- 4 **Sprint** – Sprint planning considers the tasks that needs to be completed in order to transform a user story to working tested software.
- 5 **Daily** – Daily planning consists of the daily scrum and the actual work activities.

Release/Roadmap – Planning

- ✓ Market demands
- ✓ Regulatory requirements/needs
- ✓ Expectations of existing customers
- ✓ Determining the Sprint duration
- ✓ Estimating the team's initial velocity
- ✓ Assigning individual user stories to each Sprint

Release Planning Meetings

- ✓ Release planning determines the required sprints to complete user stories and release backlog

Rolling Wave Planning

- ✓ Detail story planning for the near-term in tandem; high level planning for future stories
