Agile Transformation – Other Approaches

Other approaches for conducting an Agile transformation

Public display demonstrates commitment and is more likely to execute

Split and Seed – Split the first team and assign them to other teams to sow the seeds of Agile

Technical Practices Early – Significant success with early adoption

Stealth mode reduces the initial resistance and allows choosing when to go public

Grow and Split – Grow an entire team in Agile doctrines and then split into other teams

Technical Practices Stages – Anticipate significant resistance and watch how the team acts initially
